DETAILED ACTION

Claims 1-16 are included in the prosecution of this application.

Preliminary Amendments are acknowledged.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-16 are rejected under 35 U.S.C. 102(b) as being anticipated by EP 0652012.

EP 0652012 discloses a composition for chronic fatigue syndrome containing of amino acids, sugar, and calcium in instant amounts (Note examples 1 and 25, claim 6).

Claims 1-4, 6-10, and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Carniglia et al (5391550).

Carniglia et al disclose a composition to increase energy through the increase in ATP blood level. The dietary supplementation contains histidine, D-ribose, and magnesium phosphate (Note Table 1 and col. 7, lines 10-45).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1616

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Simone (5397786).

Simone discloses a rehydration drink for fatigue containing a carbohydrate such as D-ribose, an ammonia neutralizer such as histidine, creatine, vitamins C and E (col. 2, line 50, col. 3, line 24, Table 1/2).

Simone does not teach the specific use of ribose and histidine in examples.

It would have been to one of ordinary skill in the art at the time the invention was made to substitute histidine and ribose in the example given since Simone suggests histidine as possible ammonia neutralizer and ribose as a possible carbohydrate to be used in the invention. Further, since Simone provides the general guidance for a rehydration drink, it is deemed obvious to one of ordinary skill in the art at the time the invention was made to manipulate the amount used to obtain the best possible results.
